

ChronWell Earns 2019 Innovation Award for Advanced Technology Platform for the Workers' Compensation Industry

Insurtech's Recovry™ platform recognized for excellence in the 10th Annual Business Insurance Innovation Awards

FORT LAUDERDALE, Fla. – August 27, 2019 – Today, [ChronWell](#) announced it has been named a [2019 Innovation Award winner](#) by *Business Insurance*. Selected by an independent panel of risk managers, ChronWell's advanced technology platform, ChronWell Recovry™, was recognized as an innovative solution for the worker's compensation industry.

Recovry is a unified care navigation platform that powers ChronWell's progressive, early intervention program. Recovry's interactive dashboard is designed to facilitate early communication and engagement through empathy and advocacy for all parties, including injured workers, employers and insurers. It provides a holistic and transparent view of coordinated care for each incident by augmenting human case managers with Artificial Intelligence, providing technology-driven risk analysis and profiling, and a comprehensive psychosocial evaluation for every injured worker.

Users of Recovry and its associated services can help injured workers recover faster and employers save money by opening lines of real-time communication between employee, employer and insurer from the onset of an injury. This delivers on ChronWell's promise of providing early intervention and unified case management for all injured workers at the best value.

"We are honored that *Business Insurance* has recognized our new generation platform aimed at overhauling the broken workers' compensation system," said Joe Rubinsztain, CEO of ChronWell. "If workers are treated promptly, feel more engaged and better cared for throughout the recovery process, it can reduce the number of complex claims and improve worker injury outcomes for all."

Business Insurance's Innovation Awards, now in its 10th year, recognizes leadership, inventiveness and ingenuity in products and services designed for risk management professionals. The submissions are based on five criteria specifically addressing relevance to core concerns of risk managers, effectiveness in solving a problem in the risk management process, and the results of an actual user.

ChronWell was one of nine winning companies, along with Aon PLC, Marsh LLC, Zurich North America, Gallagher Bassett Services Inc., and more. All winners will be recognized at the Innovation Awards Luncheon in Las Vegas on September 23 during the 2019 InsureTech Connect Conference.

[About ChronWell](#)

Based in Fort Lauderdale, Fla. and founded in 2017 by healthcare and insurance technology veterans, ChronWell has developed a unified case management platform for the workers' compensation system in America. Combining AI technology, nurse case management, advanced analytics, and empathy-driven services, ChronWell minimizes the impact of workplace accidents on workers, employers and insurers. ChronWell helps navigate care from the onset of an injury through the resolution of a claim by establishing omni-channel lines of communication and providing early and ongoing intervention.
